

Research Participants Needed!

Are you a current or former soccer player?

What is the research?

- We are investigating how neurofeedback technology can train motor imagery skills to improve how people use these technologies to enhance performance.

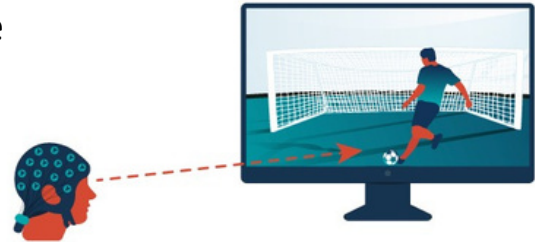

What will you do?

- You will use a brain computer interface (i-BrainTech) that measures brain activity to control an avatar in a soccer or basketball game

Eligibility

- You must have at least 5 years of competitive experience (high school, club, collegiate, professional).
- You must be between 18-35 years old.
- You must be right-footed.

Study Location

- You will complete the study at the Sport Psychology lab and nearby soccer fields at Florida State University.

Duration of the Study

- Each session will last approximately 30 minutes, and participants will complete up to 9 sessions across 3 weeks

Compensation

- You will receive \$210 for completing all 9 study sessions.

How to participate

- Contact EPLS-iBrainTechResea@fsu.edu to receive more information and scheduling details or scan the QR code.
